Lincoln Letters has been in my mind and heart for years, but it wasn't until I needed a unique graduation gift that I finally hit the Lincoln Streets with my Nikon to create art that represents the heart and soul of Nebraskans. I not only search for letters that are recognizable but I want to capture vibrant color- I LOVE COLOR, but any of the letters can also be transformed into an antique sepia or classic black and white.

### Prints:

All the prints are Metallic, unless specified differently. Metallic prints are an upgrade to the traditional print. They honestly do have metallic undertones that seem to add depth to the photos and really make a color or black and white photo pop with dimension.

### Mounting:

Your print is mounted on Masonite unless it is not available in that particular size, then we will choose the best mounting for you. They are lightweight so they can be mounted with a sticky repositionable product.

### Display Options:

A 10x30 is perfect for your whole name, an 8x10 of each letter is perfect for a fun mosaic of your entire name. A short name like John or Beal has lots of options...a longer name is ideal as a 10x30. If you want to take it to the next level, one of the options below is perfect for you!

### Framing:

All of the prints are mounted and ready to be custom framed by you to match the decor of your home. But we also offer framing too, for one stop shopping. Prices vary per size of frame and how many images will be in your frame....please inquire for your individual project.

\*A 25.00 Deposit is required for new custom designs.

Enjoy your custom Lincoln Letters art!
